Environmental Policy

At Hunter Dunning Ltd we are committed to operating our recruitment business in an environmentally responsible and sustainable manner. Our primary focus is on reducing our environmental impact by promoting sustainable practices, both within our organisation and with our clients and partners. This Environmental Policy outlines our commitment to being an environmentally conscious business and provides a framework for the continuous improvement of our environmental performance.

Our Environmental Principles:

1. Compliance with environmental laws and regulations: We will adhere to all relevant environmental laws, regulations, and industry standards.

2. Resource efficiency: We will strive to reduce our consumption of resources such as energy, water, and raw materials and seek to minimise waste generation and disposal.

3. Sustainable procurement: We will prioritize working with suppliers, partners and clients who share our commitment to environmental sustainability and integrate environmental considerations into our purchasing decisions.

4. Green office practices: We will promote a culture of environmental awareness among our employees and encourage them to adopt eco-friendly practices in their daily work, such as reducing paper consumption, recycling and conserving energy.

5. Carbon footprint reduction: We will actively work to minimize our carbon footprint by implementing energy-efficient technologies, promoting remote work opportunities and supporting the use of public transportation, or carpooling for commuting and business travel.

6. Continuous improvement: We will regularly review and update our environmental policy, objectives, and targets to ensure they remain relevant, effective, and aligned with best practices.

Hunter Dunning Ltd recognises that our responsibility to the environment extends beyond our own operations. We are dedicated to working with our clients, partners, and employees to create a more sustainable future. By implementing this Environmental Policy and regularly reviewing our progress, we are committed to minimising our environmental impact and fostering a culture of sustainability throughout our organisation.
